Space Ship

Golden Earring

I remember it happened, late one night No moon, no stars No sound, no light I was young and scared And afraid of the dark When I saw that space ship Shaped like a heart

When the years go by, just like a shot I was way too busy, growing up I was datin' girls, so I forgot All about that space ship, shaped like a heart

Well I woke up one morning, feelin' fed up and lost Runnin' out of luck, desperate for love And there she was, I kid you not That space ship, shaped like a heart

Blindin' my eyes, cloudin' my sight Givin' me hope it would be all right Space ship shaped like a heart I saw it in your eyes, and in the way you smile Right from the start

Space ship shaped like a heart Don't wanna ask me why Don't wanna say goodbye To that heart in the sky I was standin' by the window We just made love I was comin' down From the push and shove I was lookin' up I saw a spark It was a space ship Shaped like a heart
