

## That Wolf

Gomez

Head down, hiding the scar  
Drive me away in your motorcar  
I feel alive when you say  
I don't want any other at all

The way she makes me feel  
This love won't last forever  
The way she makes me feel  
This love won't last forever

Bolt down the cellar door  
Steal me away from the false of her love  
I feel a pulse when you say  
I don't want any other

Get out and don't you doubt  
Running away with a curse and a shout  
I won't rest 'til you say  
I don't want any other at all

The way she makes me feel  
This love won't last forever  
The way she makes me feel  
This love won't last forever  
This love won't last forever

That wolf might run  
Not far behind

I don't want any other at all  
The way she makes me feel  
This love won't last forever  
The way she makes me feel  
This love won't last forever

The way she makes me feel  
That wolf might run  
The way she makes me feel  
Not far behind
