

Keep the Car Running

Goo Goo Dolls

There are days when I feel that everything that's good is gone
There are times that I feel no matter what I do, it's wrong
I've walked these streets alone just living day by day
I can even feel it now, don't tell me what I'm feeling now
You shook my dreams away

Tired of waiting around
Now, what are we becoming
Keep the car running

All the answers I know
Never taking it slow
Just it keep it coming
Keep the car running

I'm not leaving without you, you're the one I can't lose
Say goodbye to all the things in life that tried to pull us down
Yeah, we'll make something of nothing
Yeah, yeah keep the car running

And I can hear the sound of that dream
Where the engines fill the boulevard
Innocence is never lost
When you feel it pounding in your heart

Don't tell me it over now
This ain't the time to rest
Bruised and battered, torn and tattered
Look at me, it doesn't matter
Still got some fight left

Tired of waiting around
Now, what are we becoming
Keep the car running

All the answers I know
Never taking it slow
Just it keep it coming
Keep the car running

I'm not leaving without you, you're the one I can't lose
Say goodbye to all the things in life that tried to pull us down
Yeah, we'll make something of nothing
Yeah, yeah keep the car running

We are, we are, we are the start of something new
Close your eyes and come with me just along to
We are, we are, we are the only thing that's true
Just believe it's you and me and know that we can't lose

Tired of waiting around
Now, what are we becoming
Keep the car running

All the answers I know
Never taking it slow
Just it keep it coming

Keep the car running

I'm not leaving without you, you're the one I can't lose
Say goodbye to all the things in life that tried to pull us down
Yeah, we'll make something of nothing
Yeah, yeah keep the car running

We are, we are, we are the start of something new
Keep the car running
We are, we are, we are the only thing that's true
Keep the car running
