

Angel of Night

Grace Slick

Angel of night from the other side of daylight
Burning like a candle till the morning light

Angel of the night blinded by the morning light
Slipping into darkness like a thief in the night

Riding 'cross the ages filling empty pages with your song
On a flaming stallion halted by the guardians of the dawn

Angel of the night angel of the night
Angel of the night angel of the night
Angel of the night angel of the night

Angel of the night from the other side of daylight
Prisoned like an outlaw on the edge of night

Angel of the night the keeper of the neon light
Draws her to the spotlight while the moon burns bright

Maybe I will love you while the world is sleeping
I will hold you tight
Till echoes from above you call you into darkness
With the morning light

Angel of the night angel of the night
Angel of the night angel of the night
Angel of the night angel of the night
