

Little Moon

Grant-Lee Phillips

How far little moon
Just a rocket away
Three nights and a day is all
Little moon

Like a beacon up high
Won't ya send down a beam
It all starts with a dream sweetheart
Little moon

How tall little flower
Growin' wild as a weed
It all starts with a seed so small
For us all
Little flower

Way up in the stars
Swirling 'round tonight
Heaven knows the future's ours
Way up in the stars

How far little ship
Sailing over the waves
By the light of the Milky Way
How far
Little ship

How far little moon
Peakin' over the roof
And the chimney tops all red
Little moon

Way up in the stars
Swirling 'round tonight
Heaven knows the future's ours
Way up in the stars

Little moon
