

Demon's Day

Grave Digger

You sit alone in lightless chambers, all the love you had is gone
No one there to catch your fall, you never felt so alone
Blackened thoughts in lonely ruins, lifeless eyes an empty gaze
Death is but a promise now, life is just an empty phrase
Demons wait in every corner, reach for you with poisoned claws
Madness spreads its wings above, you're lying helpless on the floor
No one there - lost alone - madness rules - love is gone
No escape - never try - no way out - you will die
Come out to the other side
Agony's your friend
Come out I will lead the way
In life there is no sense

You're my victim, you're my prey, I will get you on demon's day
Can't you see me, can't you feel me, I will get you on demon's day

No one there - lost alone - madness - rules - love is gone
The sun will never shine
No escape - never try - no way out - you will die
You die so alone
You've gone through hell, you met the devil, demons paved the way you walked
All alone you took the challenge, no one listened as you talked
Now you live a happy life, with all friends up in your head
Pills provide an easy shelter, all your sadness now is dead

You're my victim, you're my prey, I will get you on demon's day
Can't you see me, can't you feel me, I will get you on demon's day
