Hammer Of The Scots

Grave Digger

Do you remember, the first son and king Longshanks we call him, death he will bring As we see him coming we running for our lives At the end of the day we pay for their lies

Listen my friend his name carved in stone My skin burned the sun, no fear we show

Raise your swords high Hammer of the Scots We're like thunder from the sky Hammer of the Scots hold your flags high Hammer of the Scots we are born to die

He overcomes our land, steals our dream
Of freedom and peace, he invites us to scream
For all the dead corpses, he leaves behind
A killing machine, with anger in mind

Watch out my friend see the flag of hate Run for your life it's your final fate

Raise your swords high Hammer of the Scots We're like thunder from the sky Hammer of the Scots hold your flags high Hammer of the Scots we are born to die
