## **Living Nightmare**

## Graveworm

They take the soul and our faith Enemies - raped our lives Through hell we march Again and back

A false belief and a liar Prophets - of forbidden land A pain so real and near The end has just begun

Pain, hate, fear and death
They share the soul of every human kind
Fire, straight, torment and scare
Their blood flows
Like raindrops from the sky
The sky will fall and crushed
Hope. Gone far away
Everything seems so lost, God is dead

Their torments rise again

Demons - angels of death

Before my faith turns to dust

I will stand in hell

It's never late to kill a life Choose not to see the death by your side It's like a war in my fucking head We fight to die, I am your nightmare

Walk the line of death Swallow their lies Through darkness I've been Keep me going on and on

For all the pain you caused Lost - what I've never had Until the end of life You will burn inside
