

# The World Will Die In Flames

Graveworm

Time has come to rage insanity  
Inside the storm  
Arrive at the edge of the world  
Fall into the land of passion  
No more resistance  
Slaughter their innocent souls  
Kill their tortured minds

We're sealing our own identity  
Screaming souls that we will never hear  
Just one shot to go to hell  
There will be no more lies to tell

Where slaughter means a famous victory  
We're all obsessed to be their destiny  
Death devour our souls and minds  
Just fight and die for our glorious time

I've seen the future  
I've been the past  
I brought the terror  
I am your new god

Take me away from this torment  
Drown into the dark  
Tears of blood from suffering souls

The world will collapse in pieces  
Rape your breath  
Prepare to kill the human kind  
The world will die in flames
