Do you recall all the first ones turning to smoke and 6 was 9 we loved it then and we love it now but you are walkin' on that thin line

This time it's all up to you we all know you're on the fast track you turned the wrong step years ago into a deadly parasite

You're so awake that you can't see still trying to believe that you are free killin' yourself and the ones you love only one thing left for you to do...

When you stumbled and fell we were there and had your back everyone knows that you know it well gotta get off that thin line

This time it's all up to you we all know you're on the fast track you turned the wrong step years ago into a deadly parasite

You're so awake that you can't see still trying to believe that you are free killin' yourself and the ones you love only one thing left for you to do...

When i feel good I'm movin' slow you oughtta try to change the pace i know your flame needs air to burn so you should stop and take a breath or else your life will end

I like to let my head fly but i don't let it eat my mind don't let the speed of life blind your eyes slow down and start feeling fine if you don't quit you'll surely die get off that thin line

Got no excuses left to you feel like runnin' away from yourself so beat so tired am having to lose only thing is to get off that thin line

This time it's all up to you we all know you're on the fast track you turned the wrong step years ago into a deadly parasite

You're so awake that you can't see still trying to believe that you are free killin' yourself and the ones you love only one thing the for you to do...
