

Normal (is A Million Miles Away)

Groovie Ghoulies

I'm lookin' in the mirror wondering what is wrong with me
And normal is a million miles away
I look at my reflection kinda likin' what I see
And normal is a million miles away

We'll never fit in
I know it
The record will probably show it
The contest is over
Let's throw it

We'll go the way we go
And just let other people know

I'm feelin' like a creature in a black lagoon
And normal is a million miles away
I'm feelin' like a critter howlin' at the moon
And normal is a million miles away

We'll never fit in
I know it
The record will probably show it
The contest is over
Let's throw it

We'll go the way we go
And where we go we'll never know

I'm drowning in my feelings like I'm in a whirlpool
And normal is a million miles away
But suddenly I'm down the street and everything is cool
And normal is a million miles away

We'll never fit in
I know it
The record will probably show it
The contest is over
Let's throw it

We'll go the way we go
And where we go we'll never know
