

We Are Stronger

Gungor

Give and take
Snow or sand, it's all the same from far away
You and me
We're the stuff of stars and dirt
With eyes to see

I can't meet you eye to eye
But I can take your hand in mine

We are better together
We are the ocean tide
Freedom and the anchor
When we're together

We are better together
We are the day and night
Together we are stronger
We are stronger

A starry sky
Solitary sparks that find a greater light
Desert land
Sprawling miles and miles
With only grains of sand

Oceans from drops of rain
Everybody made the same

We are better together
We are the ocean tide
Freedom and the anchor
When we're together

We are better together
We are the day and night
Together we are stronger
We are stronger

We are better together
There is no real divide
The winter and the summer
We are stronger
All together

Every black life matters
Every woman matters
Every soldier matters
All the unborn matter

Every gay life matters
Fundamentalists matter
Here's to life and all its branches

All together we are stronger
We belong together

We are better together

We are the ocean tide
The freedom and the anchor
When we're together

We are better together
We are the day and night
Together we are stronger
We are stronger

We are better together
There is no real divide
The winter and the summer
We are stronger
