

Bring The Stars

H.E.A.T

I cant think of anyplace meant to be than right here in
your arms
the love I feel the hunger for you it keeps on haunting
me
and every night when I'm alone with you
ohh you make me feel that I live inside our dream

You make the stars start falling baby bring the stars
we will make all our promises under the stars

Days we'll think of days we'll never forget when you
walked into my life
like a storm meets sea that painted our memories with
love

And every night when I'm alone with you
oh you make me feel that I live inside our dream
