

Time on Our Side

H.E.A.T

We're not the ones we used to be
What happened to our chemistry
(What happened to our chemistry)

Can't put my finger on it now
What can we do to turn it around
(What can we do to turn it around)
Turn it around

I know it gives you peace of mind
But would you walk away
And leave our world behind
And if you give it another chance
I would give my all
The future's in our hands

Don't leave now
Please stay around
Time's on our side, yeah
Don't leave now
Just thank god we're alive
'Cause time's on our side, yeah

How could I watch you walk away
It scares me every single day
(It scares me every single day)
Every day

And what a stupid game to play
I can't believe the mess I made
The mess I made

Please won't you take my hand
I would give my all to feel it once again

Don't leave now
Please stay around
Time's on our side, yeah
Don't leave now
Just thank god we're alive
'Cause time's on our side, yeah

Don't leave now
Please stay around
Time's on our side yeah
Don't leave now
Just thank god we're alive
'Cause time's on our side
