

Life

I keep working on my cure for longer life
Day and night - night
My reagent even wakes you if you die
Back to life - life

Spending hours in my lab
Treating rats, guinea pigs,
My neighbour's cat - and Dr. Gruber
A little side effect:
After injecting them with life,
They scream aloud and getting uber

This guy called Hill - does not have any skill
Talking about minutes, six to twelve
That's a lie
This debate's more than just a strife
He's ignoring all my facts,
But I will bring men back to life

Life

Back to life

I keep working on my cure for longer life
Day and night - night
My reagent even wakes you if you die
Back to life - life

After the setback - still searching for a cure
and keep my work ahead - by improvising
But still I have to find a lab - to make it pure
find someone to assist, pretending socializing

His name is Cain, he thinks that I'm insane
But he needs the rent - for a house with basement
A perfect Igor for my plan
Helps me to get into the morgue
So I can finally start work

Day and night - night
My reagent even wakes you if you die
Back to life - life

I keep working on my cure for longer life
Day and night - night
And even if the failures became rife
Back to life - life
