

## Force Quit

Hades

You'll get over it  
That's bullshit  
Seen it for myself  
It wears you down and won't quit  
Forging straight ahead  
Stopped dead  
Like a deer caught in the headlights  
Enough said  
Shift command  
Escape the program, restore  
Functionality  
Recover once more  
Watched it turn a man  
By his own hand  
Into someone I can  
Barely understand  
Zapped his will to be  
Lost his partner, now he's half  
Of what he used to be  
Confront the things unimagined  
And prepare, but it's impossible  
I just hope you can  
Land on your feet  
When death come calling  
On the ones you love  
He's gotta fill the void  
Paranoid  
To live alone  
A fate he surely cannot avoid  
Time is running out  
Without a doubt  
Wish I knew a way to figure it all out  
Shift command  
Escape the program, restore  
Functionality, recover once more
