

It's Different With You

Hank Williams Jr.

I've been all around big cities country towns
Lovers I've had quite a few
But the older I grow the more that I know
It's different with you

Society page and suntan bays
The game I played by the rules
Oh I used to be the sort who thought love was a sport
But it's different with you

A sincere warm smile and a soft easy style
Were things that I'd never knew
So I guess this is love but one thing I'm sure of
It's different with you

And now I have learned and to whom it may concern
It's different with you
It's different with you
Different with you
