

# Cradle Of The Night

Hanker

Goodnight everybody, will you please shut the light?  
Goodbye everybody, I need to close my eyes  
Goodnight everybody, please let me dream tonight  
Goodbye everybody, I've got to leave my life  
In the cradle of the night  
In the cradle of the night  
Don't care about yourself  
Look out here it comes

Light! Shining in my eyes  
I can't move my legs are afire!  
I can't breathe no more  
I just wanna live  
Let me live  
I just wanna live  
In the cradle of the night  
In the cradle of the night  
Don't care about yourself  
Look out here it comes

The Nation is now a memory  
The atmosphere is cold and black  
People gotta stay home! Stay home!  
Justice and freedom have been done  
But dearly paid  
We're dying  
We're dying  
We die!

Light! Shining in my eyes  
I can't move my legs are afire!  
I can't breathe no more  
I just wanna live  
Let me live  
I just wanna live  
In the cradle of the night  
In the cradle of the night  
Yet you touch the stars  
Welcome to heaven  
Am I in heaven?
