

United We Stand

Hardline

I heard you calling my name in the wind
And felt you needed a helping hand
The pain we go through stays under our skin
We know our life is never as we planned

We've been waiting for the sun to rise up
On this desperate land
We've been trying to keep our souls down
United we stand, oh

Ain't no mountain we couldn't climb
The world is holding us down
They've been hiding when stealing our time
They keep us in the darkness all the time

We've been waiting for the sun to rise up
On this desperate land
We've been trying to keep our souls down
United we stand

We're gonna make a different rule
We're nobody's fool, yeah

We've been waiting for the sun to rise up
On this desperate land
We've been trying to keep our souls down
United we stand
