

# Where Will We Go from Here

Hardline

Here we stand, united we go  
We have our rules to make us grow  
No one will deny, what we keep in our hearts  
No one will take away, what we reaped and then we sow  
Feeding the fire, we'll keep ourselves alive  
Chasing the wind in our sails

Where will we go? Where will we go from here?  
We are alive, no matter what the cost  
Where are we now? We walked a thousand miles so far  
We always rise again, and never get lost  
Where will we go from here?

Here we are, blood thick as stone  
We have our dreams to chase that goal  
Nothing will ever change if you keep it all within  
Nothing will be forever when you push it all aside  
Feeding the fire, we'll keep ourselves alive  
Chasing the wind in our sails

Where will we go? Where will we go from here?  
We are alive, no matter what the cost  
Where are we now? We walked a thousand miles so far  
We always rise again, and never get lost

Within my hand I'm searching for  
A place I knew we felt it more  
When we're searching to find a peace of mind  
Will we take the chance and never look behind?

Where will we go? Where will we go from here?  
We are alive, no matter what the cost  
Where are we now? We walked a thousand miles so far  
We always rise again, and never get lost

Where will we go from here?  
We are alive, no matter what the cost  
Where are we now? We walked a thousand miles so far  
We always rise again, and never get lost

Where will we go from here?

Where will we go?
