

Shine A Light

Hardwell

I'm feeling lonely no one to hold me
I can't sleep at night
Cause' I found a something I can't explain it
I keep questioning why

Without you, I just fall apart
Only your fire can light the dark
I need your love to open up my eyes

Shine a light and I will find you
Call my name and let it guide you
We can face the world, side by side
If you give your heart
I'll trade mine

Shine a light and I will find you
Call my name and let it guide you
We can face the world, side by side
If you give your heart
I'll trade mine

Shine a light and I will find you
Call my name and let it guide you
We can face the world, side by side
If you give your heart
I'll trade mine

Shine a light and I will find you
Call my name and let it guide you

We can face the world, side by side
If you give your heart
I'll trade mine

Battle the weather
Better together than when we're alone
Just dance through the pain
And we'll find a way for us to make it home, home

Without you, I just fall apart
Only your fire can light the dark
I need your love to open up my eyes

Shine a light and I will find you
Call my name and let it guide you
We can face the world, side by side
If you give your heart
I'll trade mine

Shine a light-
We can face the world, side by side
If you give your heart
I'll trade mine

Shine a light and I will find you
Call my name and let it guide you
We can face the world, side by side

If you give your heart
I'll trade mine
