

# So Close

Hardy

My body, your body up under the covers  
Whiskey and wine mixed into each other  
Salt on your skin like we're lost in the ocean  
Tied in a knot, locked up in emotion  
Wherever you were, girl, that's where you'd find me  
One and the same like a shadow beside me  
Day into night, yeah, night into day  
Baby, needless to say

We were so close  
To forever, like we never said goodbye  
We were almost  
On top of the world like a rocket in the sky  
But we crashed hard  
We can't say we were written in the stars  
But damn, babe  
We were so close, we were so close

Those tail lights faded out in the distance  
Screamin' your name, but no one was listenin'  
Now, there's a mountain between you and me  
And it kills me knowin' that we

Were so close  
To forever, like we never said goodbye  
We were almost  
On top of the world like a rocket in the sky  
But we crashed hard  
We can't say we were written in the stars  
But damn, babe  
We were so close, we were so close

We were so close

And who knows  
Maybe, one day, we'll give it another try  
'Cause God knows  
There's gotta be a reason you and I

Were so close  
To forever, like we never said goodbye  
We were almost  
On top of the world like a rocket in the sky  
But we crashed hard  
We can't say we were written in the stars  
But damn, babe  
We were so close, we were so close

We were so close  
We were so close, baby, yeah (Woo)  
We were so close
