Seeds of Shame

Hatesphere

Head down the dust I seek what hurts I'm only satisfied with a broken lip You know I need the whip

From a world of pain I scream her name My mouth is bleeding from sucking the seeds of shame

Unholy dreams The secret name Ride like the devil Down his black highway

From a world of pain I scream her name My mouth is bleeding from sucking the seeds of shame

Peel my skin Twist the pain Feed the flame Will I burn in hell?

Peel my skin Twist the pain Feed the flame Will I burn in hell?

Face down in the dirt I love all that hurts I'm only happy with a broken lip You know I want the whip

Peel my skin Twist the pain Feed the flame Will I burn in hell?

From a world of pain I scream her name My mouth is bleeding from sucking the seeds of shame
