

Cuts And Bruises

Heart in Hand

I can't believe you have stuck by me after all you heard,
(after all these years)
It means so much to me that you're still around,
so scream as loud as you can.
(scream as loud as you can)

Let's make tonight a night to remember,
fuck what you heard.
Let's make tonight a night to remember,
at least this once

So what am I supposed to do?
Just stand here and take this?

Sticks and stones won't even break me,
this time,
I still have the scars from before.
Sticks and stones won't even break me,
this time,
Over time I will heal.

So take a step back,
And show me what you've got.

You know it's all just lies,
I'll rise above this,
wish I could find a better way to thank you.
This doesn't feel enough.

So what am I supposed to do?
Just stand here and take this?

Sticks and stones won't even break me,
this time,
I still have the scars from before.
Sticks and stones won't even break me,
this time,
Over time I will heal.

And after everything,
You stick by my side (by my side)
And after everything,
(after everything)
How could I as for anything more?

This is my life,
And I'm going to live it.
