

Don't Worry What the Experts Say

Heather Nova

Don't love me because you need me
Don't want me because you're empty
Don't
Fill the places in your psyche
You should be ok without me
Don't
Listen to that crap

Cause I want what you want
And we don't have time to figure out
What everything is all about
If it feels good then it is good
And don't worry what the experts say
I'm gonna love you anyway

There'd be no stars without the dark
No firelight without a spark, yeah
The sea is lonely for the shore
Take it away I want it more, yeah
We're human every time

I want what you want
And we don't have time to figure out
What everything is all about
If it feels good then it is good
So don't worry what the experts say
I'm gonna love you anyway

There's a road that leads around
The sweetest part of you I've found
And though I know I might be wrong
I thought I heard it in a song sung
So many years ago

Cause I want what you want
And we don't have time to figure out
What everything is all about
So hold me and kiss me
And don't worry what the experts say
I'm gonna love you
If it feels good then it is good
And don't worry what the experts say
We'll blow those theories clean away

I'm going to love you anyway
