

Talk To Me

Heather Nova

Talk to me, talk to me
Like you used to darling
I know it's cold, I know it's late
But lets' go out walking
Cause we haven't heard each other in a long time
And we have been treading water, living side by side

You take my breath away, yeah you still do
Even though we've been down
So come on talk to me, come on
Even though we've been down

Come to me, come to me
Like you used to darling
Every day, every way
We've been losing something
'cause we haven't held each other in a long time
And I need to feel your body close to mine

You take my breath away, yeah you still do
Even though we've been down
So come on talk to me, come on
Even though we've been down so long

'cause it's still inside you and it's still inside you
Still in our blood in our memory
I'm still longing for you, are you longing for me?

You take my breath away, yeah you still do
Even though we've been down
So come on talk to me, come on
Even though we've been down
