

Nicotine

Heffron Drive

Figuring out it's habitual
I hear you calling my name at night
Picking you up's like a ritual
Breathing you in it clears my mind

You often make me feel like I wanna fly
I travel the whole world, but I keep you nearby
Letting you go is impossible, only you can help me to unwind

I'm not giving up for nothing, no
They tell me I'm dead if I don't leave you alone
Like nicotine

We've got nothing but potential now
Try but I can't put you down on my own
Like nicotine

Drowning myself in your chemicals
Feeling my heart intoxify
Lighting you up was so casual
Now I'm craving you all the time
(You're so addicting, you're so addicting)

Addicted to everything you represent
And when I'm feeling strung out, you're my supplement
Telling myself that I'm functional
But you have a high I can't deny
(You're so addicting, you're so addicting)

I'm not giving up for nothing, no
They tell me I'm dead if I don't leave you alone
Like nicotine

We've got nothing but potential now
Try but I can't put you down on my own
Like nicotine
