The Hand

Hellion

Here I am like the gypsy said Several years before Inside my hand lies my destiny It lead me to your door

Don't ask me why
I do not know
I'm finding it hard to believe
The lines in my hand's where my future lies
But Lord am I being decieved

The secret pact the leaders kept
Hath brought war to the land
Just like the words that the gypsy spoke
This is where I stand

Don't ask me why
I do not know
I'm finding it hard to believe
The lines in my hand's where my future lies
But Lord am I being decieved

What can you do when your life's on the line Like the gypsy had planned You've got to make it your way No matter what they say Don't be a slave to the hand You've got to understand the hand
