

# Too Late To Turn Back Now

Hem

See all the numbers getting larger  
See all the streets are getting stranger with the crowd  
You know we both been feeling reckless  
Since we crashed into the come down

Take one more step into the station  
We'll flag the first train down and fade into the wings  
We got no need to change direction  
We could only keep on moving

But what can keep us moving forward  
Now that there's nothing left to burn, anyhow  
What will keep you next to me, my love  
Since it's too late to turn back now

I caught your face in the reflection  
I thought I recognized the corner of your smile  
A tired light from your direction  
That will keep me in the meanwhile

But what can keep us moving forward  
Now that there's nothing left to burn anyhow  
What will keep you next to me, my love  
Since it's too late to turn back now  
Yes, it's too late to turn back now
