

Feel the glow it's here to stay  
The earthly astral interplay  
The Starbreeze  
Oh, it must be fed  
Time to face the music that's ahead

Starry night o' night so bright  
Behold our pixeled cosmic sight  
Past the solar wind lies a Starbreezes  
The cooling flame, the lion's gaze  
The golden bars on heaven's gates  
Beyond the glow of Venus, a star is born

Is this the age they'd sung about  
In hippy tales of galaxies?  
Beneath the sugary sky lies a Starbreeze  
Rainbow excites the child's eyes  
The pastelled stellar dance tonight  
Betwixt our moon and Venus, a star of beauty; me

Let this gust wash over me  
I'm soaring through the air  
Higher and higher and higher again  
Higher and higher, please never end  
Till I'm dead...

[Guitar Solo - D Skene]

Gather round and stay a while  
It's time to face the music ahead!
