

## Meteors

### Her Bright Skies

So here I stay  
With your heart in my hands  
On the birch of coming clean  
The whole universe keeps it  
Don't act surprised  
Deep down you always knew  
With this falling off my chest  
I got nothing left

Teardrops fall like meteors  
They burn up in the atmosphere  
You thought so much more of me  
Winter slowly pass to spring  
No words can set things right again  
You deserve much more than this

I've calm a storm break the black cloud over us  
Take you some place warm  
We haven't been before  
Let's pick it up where we left off  
Where it was you and me  
And just our love  
I take all the change  
But I got nothing left  
I got nothing left

Teardrops fall like meteors  
They burn up in the atmosphere  
You thought so much more of me  
Winter slowly pass to spring  
No words can set things right again  
You deserve much more than this

So here I stay  
With your heart in my hands  
Yet here I said  
I've calm the storm  
Break the black cloud over us  
The black cloud over us  
The black cloud over us  
The black cloud over us

Teardrops fall like meteors  
They burn up in the atmosphere  
You thought so much more of me  
Winter slowly pass to spring  
No words can set things right again

Teardrops fall like meteors  
No words can set things right again now
