

# Birds Of Prey

Hexx

Moving along the assembly line of society  
Becoming another piece of the machinery

You are expendable  
The wars go on for years  
You are replaceable  
Just so many circuits and gears

Abomination of nature  
Blasphemy of creation  
The plagues now take their toll  
Lessons in germ warfare  
Cut out infected organs  
Replace them with machinery

Our leaders are all playing God  
Now we are running out of what we've got  
They need a soldier that never dies  
In a future that's a little less civilized

Birds of prey fill the air  
Sent to cleanse with rains of fire

In ivory towers with marble stairs  
In front of TV walls sit billionaires  
Live footage of the battles is always on the air

All those years spent going to school  
Mind your manners, follow the rules  
Don't you step out of line  
Getting nowhere, running out of time

Round and round we go  
Spinning on our solar star  
Picking up the pace  
Final evolution of the human race

See the glow of the burning cities  
In the distant evening sky  
Hear the fighting getting closer  
Fulfill your program, kill all that is alive

The will to kill is your only memory  
Whose brain is behind those eyes?

For your crimes against society  
We have a new death penalty  
Take out your identity  
Replace your brain with control circuitry

Birds of prey fill the air  
Sent to cleanse with rains of fire

Chemicals fall from a smoke-filled sky  
Freezing your lungs, melting your eyes  
Blistering your skin but you'll never die

It was then that I could see  
All earth creatures will be extinct  
Killed by the one with the mechanical brain  
Killed by the beast called human being

Close the door and don't go back  
There is no way I'll go back that way  
Lock the door, lose the key  
It's not for you, not for me...

Don't go down that path again  
There is nothing there for us, my friend  
There is what is and what should never be...

Lies!  
Hate!  
Greed!  
Birds of prey!
