

Party Girl

Hey Violet

Party girl gotta stay high all the time
High all the time, high all the time
Don't bring the room down, bring the room down
Everybody watching you now

Nothing like the music up too loud
Take a feeling then I'll drown it out
Put the bottle to my lips and just slip on back down
Nothing like the best friends I've made
That couldn't even tell you my last name
Fill the bottom of a parliament and let the world fade

Living up to low expectations one at a time
Two in the morning, coming alive
Showing up with three is a crowd so I came alone
Before I get lonely just take me home

Party girl gotta stay high all the time
High all the time, high all the time
Don't bring the room down, bring the room down
Everybody watching you now

Party girl gotta be the last one to leave
Last one to leave, so nobody sees
You spilling your cup, running makeup
Everybody love the life of the party girl

Don't remember anything, that's tight
People wanna know if I'm alright
So I tell 'em that I'm good and that I'll be there tonight

Living up to low expectations one at a time
Two in the afternoon, wanna die
Falling back asleep from 3 until like 4pm
Wake up and do it all over again (all over again)

Party girl gotta stay high all the time
High all the time, high all the time
Don't bring the room down, bring the room down
Everybody watching you now

Party girl gotta be the last one to leave
Last one to leave, so nobody sees
You spilling your cup, running makeup
Everybody love the life of the party girl

Ah
Everybody love the life of the party girl
Ah
Everybody love the life of the party girl

Living up to low expectations
Low expectations
Living up to my reputation
Everybody love the life of the party girl

Living up to low expectations

Low expectations
Living up to my reputation
Everybody love the life of the party girl

Party girl gotta stay high all the time
High all the time, high all the time
Don't bring the room down, bring the room down
Everybody watching you now

Party girl gotta be the last one to leave
Last one to leave, so nobody sees
You spilling your cup, running makeup
Everybody love the life of the party girl

Ah
Everybody love the life of the party girl
Ah
Everybody love the life of the party girl
