Cage it up, let it free This is you, this is me When it ends, we begin Say a prayer as we sin

Follow rules or rebel Keeps secrets, live to tell Once a false, but it's true Where's the line, me and you

Make it right, can't you see Let's unite, victory Make it right, instantly Let's unite, victory

This is life, this is death This is right, this is breath This is true, how I feel This is raw, this is real

This is back, this is front This is black, this is white This is bad, this is want These are tears I won't cry

This is in, this is out
This is up, this is down
Make it right, give it more
Let's unite with this chord

This is life, this is death
This is right, this is breath
This is true, how I feel
This is raw, this is real

Don't take what you need
Leave me here just to bleed
I can break just like you
I can cut, I can bruise
This is raw
This is real

Make it right, can't you see Let's unite, victory Make it right, instantly Let's unite, victory

This is life, this is death
This is right, this is breath
This is true, how I feel
This is raw, this is real
