

Zero Gravity

Hollywood Ending

T Minus 10 9 8 7 6
We have main engines start
4 3 2 1
And lift off
Lift off

You say that I don't understand
I think it's harder to pretend
That we're just stars
And our love was written in the sand
My heart was beating in your hand
You made your mark

Gone without a trace in this dark space

It's like zero gravity
I'm lost without you an astronaut spinning carefully
But you're still mad at me
This will be the last of my calls,
Last of my love, last of my late night episodes
You'll never know how much it takes to breathe
In zero gravity

I can't face the weather on my own
I wish things will get better but they don't
Lay me down I need a bed of attention
I come alive inside a different dimension

Gone without a trace and here I'll stay,

I'll stay in zero gravity
I'm lost without you an astronaut spinning carefully
But you're still mad at me
This will be the last of my calls,
Last of my love, last of my late night episodes
You'll never know how much it takes to breathe
In zero gravity, in zero gravity
It's like zero gravity

Watcha do to me
Girl, you're killing me
And I don't wanna be in love with you
In zero gravity

(Houston! Houston! We need help)
(Mayday! Mayday!)
(main engines are down)
(We're spinning out of control)

In zero gravity
I'm lost without you an astronaut spinning carefully
But you're still mad at me
This will be the last of my calls,
Last of my love, last of my late night episodes
You'll never know how much it takes to breathe
In zero gravity

(Flight control listen very carefully to the situatuon)
(Obviously a major malfunction)
