

Come My Way

Hot Chelle Rae

Say you're tired of the bullshit
And I can't take one more night knowing you're so close
And we're sleeping alone
Yeah it sounds kind of stupid
To stay at home and miss you
From two blocks away you'll say I'm crazy but

Won't you take everything that you have
Throw it all in a bag
Get your car head to my place
You can leave your old life behind
No need to press rewind
This time I think you should stay

When you come my way
You can come my way
You can come my way
You can come my way
You can come my way
I can take your pain
I can take your pain
Take it day by day
You can come my way

Yeah we all got our problems
But I want yours to be mine give me all of you
I know you got me too
Took a minute but it's all right yeah
Right now right tonight yeah
Isn't happy something we both deserve?

Won't you take everything that you have
Throw it all in a bag
Get your car head to my place
You can leave your old life behind
No need to press rewind
This time I think you should stay

When you come my way
You can come my way
You can come my way
You can come my way
You can come my way
You can come my way
I can take your pain
I can take your pain
Take it day by day
You can come my way

[illegible]

You can come my way

When you come my way

You can come my way

You can come my way

You can come my way

You can come my way

You can come my way

I can take your pain

I can take your pain

Take it day by day

You can come my way

You can come my way

You can come my way

You can come my way

You can come my way

You can come my way
