

Chemical Clouds

Hotel Lights

chemical clouds rush
our shoes were wet, after the rain
wet street lights
it's in your goodbye
on the other end of the line
new electric sparks

you're standing clear in the midday sun
and your eyes have made the change
you're coming 'round the bend
you can be happy, you don't believe you've been

moods roll by like the wind
when you can't forget
it was 5 a.m. til you shook that bad dream

you're standing clear in the midday sun
and your eyes have made the change
you're coming 'round the bend
you can be happy, you don't believe you've been

like you were brass knuckles, you broke the night
fought to fasten, you broke the night
all the lights surround, you broke the night
like you were brass knuckles, you broke the night

you're standing clear in the midday sun
and your eyes have made the change
you're coming 'round the bend
you can be yourself, you don't believe you've been

chemical clouds rush
our shoes were wet
after the rain
