

# Revelation

Hughes Turner Project

If I look familiar, it's only what you see  
It's your perception, what I used to be  
So saturated, I wear a different face  
I'm so frustrated with the human race

No, you can't live for me, don't want your sympathy  
The cut's too deep you see, I got your remedy

Do you really wanna go there with me?  
Don't you know it's really something to see?  
Do you really wanna go there with me?  
Don't you know it's really something to see

Here comes the change so let's open the door  
I'm not the same anymore

Don't want your conversation, don't need no aggravation  
That's when I knew I had my revelation  
Don't need no demonstration, I'm in my transformation  
That's when I knew I had my revelation

Am I a stranger? Am I a friend?  
Do you think you know me, you better look again  
Feel so infected with all the lies  
Get resurrected, open up your eyes

I got so much to say  
You're gonna hear me anyway  
Ain't gonna make no big display  
So what's up? Get outta my way

Do you really wanna go there with me?  
Don't you know it's really something to see?  
Do you really wanna go there with me?  
Don't you know it's really something to see?

Here comes the change, so let's open the door  
I'm not the same anymore

Don't want no confrontation, don't need no situation  
That's when I knew I had my revelation  
Don't want no condemnation, I got my inspiration  
That's when I knew I had my revelation

Here comes the change, so let's open the door  
I'm not the same anymore

Don't want no confrontation, don't need no situation  
That's when I knew I had my revelation  
Don't want your conversation, don't need no aggravation  
That's when I knew I had my revelation
