

AFTER LIGHT

Hyde

Into this hole I sink
Nowhere to run for cover
It's trying to bury me
But I will not surrender

We will never be the same again

Kotae wa kutsuu no saki ni

From the dark
We walk to the light
From the shadows
We learn to survive
When there's nothing to hide we will find
What comes next
After light

Destroy, rebuild
Now, now

I hear the angels sing
But I hear the demons louder
Destruction chasing me
Pulling me under

Pulling me under now
I'm dying to get out

We will never be the same again

From the dark
We walk to the light
From the shadows
We learn to survive
When there's nothing to hide we will find
What comes next
After light

Destroy, rebuild
Now, now
Destroy, rebuild
Now, now

Kotae wa kutsuu no saki ni
I found my way

From the dark
We walk to the light
From the shadows
We learn to survive
When there's nothing to hide we will find
What comes next
What comes next

From the dark
We walk to the light
From the shadows

We learn to survive
When there's nothing to hide we will find
What comes next
After light

We will never be the same again
