

# The Place Where We Belong

Hydria

It's not too high to be reached  
Too strong to defeat  
Too hungry to feed, to alone to lead  
We can't just let you forget  
The cross that we bear  
The nights we've spent lying in hell

They can't take it from us  
We'll keep claiming for more  
This place they want to ignore  
It's the place where we belong

It's safe in me  
What I long to be  
And I'll fight for my own rights  
To save my dignity

All of the tears that we have shed  
It's the price that we pay  
For all your greed and our helplessness  
There is no justice for us  
There's nowhere to run  
There're only your false empty word

They can't take it from us  
We'll keep claiming for more  
This place they want to ignore  
It's the place where we belong

It's safe in me  
What I long to be  
If we fight for our own rights  
We'll taste our freedom  
It's safe in me  
Where I long to be  
And I'll fight for my own rights  
To save my dignity

They can deny but there's no way to  
Hide all their disregard  
And the truth will always remain  
The youth keeps screaming for a better chance  
But no one can hear a sound  
'Cause silence is more convenient

It's safe in me  
What I long to be  
If we fight for our own rights  
We'll taste our freedom  
It's safe in me  
Where I long to be  
And I'll fight for my own rights  
To save my dignity
