

Normal On The Outside

Hypnogaja

I feel the weight of your stare
But you don't see what's really there
All you know is what you see
But you don't know what's inside of me

Do you really wanna know what's inside of me?

All you know is normal
All you know is where you've been
All you know is normal
You don't want to see within

Does the outside feel safe?
Is the inside too hard to face?

You don't wanna know what's inside

I am only normal on the outside
Inside I'm everything that you fear
You stare but you don't want to see me
I scream but you don't want to hear
