

# I Am The Wind

Hypnos

I am the wind, lost in time  
deep forest ghost, your silent...silent laugh  
I am the wind all over the world  
watching the stars hidden in crawling fog

I am the wind, a freezing storm  
I am desert grip, perfidious northern stroke  
As cold as death, as hot as hell  
Dark breath of night, still the lonely wanderer

So fly with me,  
spread your arms and try to forget gravity  
there's one more step from mind's edge to eternity  
we're getting higher, feeling a bit free...

I am the wind that falcons use to fly  
upon the frozen lakes we unite  
I am the wind, you'll never catch up with me behind the polar line - I'm reborn

So fly with me  
become a piece of immortal history  
be shadow, be raincoat over storming seas  
no better freedom could be my own destiny
