

I said (I said), I saw it coming (I saw it coming)
Where did you see it!?
Where did you see it!?

I said (I said), I saw it coming (I saw it coming)
Where did you see it!?
Where did you see it!?

Why are you panting baby?
Is it too hard to keep up with what you said?

From the outskirts of common sense, this is extremely uncommon.
So many lights ahead, if only we kept our eyes open.
But now I understand that even if I was blind,
I could have clearly seen how filthy you really are.
But now I understand that even if I was blind,
I could have clearly seen how filthy you really are.

Sure.

It would have been an excellent story,
but I had to get up off the train.
Get up, jump off with me,
hold my hand and I'll explain everything.

If only it was that easy, story teller..
Would you mind never speaking to me again?
If only it was that easy, story teller..
I would like for you to remain a myth.
(Close the book, burn it up)

Tell me another lie,
That it's all going to be OK,
eating up every word you say,
It's starting to taste good.

I haven't heard one thing you have said;
this whole time you were talking
I was too busy picturing you dead.

I haven't heard one thing you have said;
this whole time you were talking
I was too busy picturing you dead.

"Everything I thought you would be,
and everything you thought you'd be
I thought before I thought before it.
And everything you were about to be
I was thinking about, but then everything
in front of my eyes became an optical illusion
and then I wanted to strangle you.
Strangle you so hard 'till you choke
and bleed and bleed everywhere.
I don't want to see it, but I have to see it
because you enjoy the my/the pleasure
as much as I enjoy the pleasure of killing you.
I want to kill you. Amen. Amen.

You said that before you said you believed in Christ.
Oh my God..."

If I were to end abruptly,
would it leave you wanting more?
If I were to end abruptly,
would it leave you...

If I were to end abruptly,
would it leave you wanting more?
If I were to end abruptly,
would it leave you...

(Wait for it, wait for it)
