

The Vision and Scarlet Witch

I Set My Friends on Fire

Total humiliation
You're witnessing my deterioration
Beside me is where you would stay; you said
You stood close by and watched my decline instead

I see the best in everyone
And you see the worst
You're gonna be immersed
When the roles are reversed

Yeah, definitely screwed
No the bond cannot be renewed
Our run was discontinued
Now you're worth less than what you were valued

Wait, I can't catch up to you
You're almost finding somewhere new
Attenuation rendered no intensity
What we went through altered my density

Eyes closed foot fully on accelerate
I'm not going to make the jump in time if continents don't consummate
It's okay, life isn't really that great
I gave you a funny look when you started to exaggerate

Where you are, where you're not
Where you're going
Try to play off the sadness but it's still kinda showing I feel it to
o

How it is, how it's not
How it doesn't ever get any sunlight but it's still kinda growing
I knew it grew

Say you're A.I
You can't store a lie
It's a dark day
And I'm taking every single thing they say not to take
As if I ache
I haven't decided...

Maintain mainframe
Drain the soul
You know it's more than you're told
Raise the voltage once you pass the threshold

Wait, I can't catch up to you
You're almost finding somewhere new
Attenuation rendered no intensity
What we went through altered my density
