

Where You Let it Go

I the Mighty

It started with a kiss.
That one little moment set this whole thing in motion.
I try to follow script,
But I fall into your iris like I'm diving in the ocean.

And now I don't ever want to come up for air.
Maybe we can just stay right here,
Till this world is over.
I try to hold back, but I let it out.
I'm not even sure what I'm on about...
I guess all I'm trying to say is

That I will love you
Even if we're just energy, if we're just energy.
I will love you
Even if we're just energy out in the universe.

Even if we're just energy out in the universe.

I don't ever wanna come up for air.
Maybe we can just stay right here,
Till this world is over.
I try to hold back, but I let it out.
I'm not even sure what I'm on about...
I guess all I'm trying to say is

That I will love you
Even if we're just energy, if we're just energy.
I will love you
Even if we're just energy out in the universe.

Even if we're just energy out in the universe.

Even if we're just energy out in the universe.

I will love you forever.
I will love you forever more.
I will love you forever.
I will love you forever more.
