

# One Love

Ian Dury

One looks for happiness  
One longs to find a partner  
One knows that nowadays  
One love will be the answer

One sees a crazy world  
One needs a fresh perspective  
One comes to realise  
One love's a true objective

One seeks a perfect love  
One learns to tell the difference  
One finds in consequence  
One love is all that makes sense

One hopes there'll be a way  
One peers into the distance  
One thinks that come what may  
One love will be the best chance

One love (one love) and only one (only one)  
One love (one love) to last forever  
One love (one love), only one love (one love)  
One love, it's now or never

One tries to draw a line  
One draws a swift conclusion  
One tells oneself in life  
One love is the solution

One falls in love at last  
One celebrates the meeting  
One always will because  
One love cannot be beaten

One love (one love) and only one (only one)  
One love (one love) with no misgivings  
One love (one love) only one love (one love)  
One love, while we're still living

One tries to draw a line  
One draws a swift conclusion  
One tells oneself in life  
One love is the solution

One falls in love at last  
One celebrates the meeting  
One always will because  
One love cannot be beaten

One love (one love) and only one (only one)  
One love (one love) to last forever  
One love (one love) only one love (one love)  
One love, it's now or never

One love (one love) and only one (only one)  
One love (one love) with no misgivings

One love (one love) only one love (one love)  
One love, while we're still living
