

Enemies

Icon for Hire

Here we go again
Do-si-do again
One step, two steps back and forth
It's a dance we do
I know all the moves
Three two one, they're back for more

I give them names
Anxiety wants to play
Panic will be here soon
We've got lots of things to do

I make friends with all my demons
They depend on me to feed them
They follow me around
They follow me around
I don't have the heart to end it
Guess we're kind of codependent
With friends like these
Who needs enemies?

Will I ever learn?
Looks like I prefer to pick the devil that I know
And so I keep my enemies close
And I collect them all
Look at them all
We make quite a crew
There's depression, addiction
And we've got lots of room for you
But it's costing me
Killing me constantly
Parasites: Come spend the night
And you can stay as long you like
And I've tried to be nice
But they're bleeding me dry
Here's some advice:
Don't feed your vices or they'll love you for life

I make friends with all my demons
They depend on me to feed them
They follow me around
They follow me around
I don't have the heart to end it
Guess we're kind of codependent
With friends like these
Who needs enemies?
Enemies
Who needs enemies?
Enemies
Who needs

On Wednesdays we wear hazmat suits
And walk the city streets
Smile at everyone we meet
We're delightful when we wanna be
Soon you'll hear us knocking on your door
We could always use one more

We came here to cheer you up
Do you wanna play with us?

I make friends with all my demons
They depend on me to feed them
They follow me around
They follow me around
I don't have the heart to end it
Guess we're kind of codependent
With friends like these
Who needs enemies?
Enemies
Who needs enemies?
Enemies
Who needs enemies?
