

Misery, misery is the venom in my brain
Killing me, killing me but I don't feel the pain
Running from somethin' that I can't really explain
Misery, misery is the venom in my veins

It's been kinda cold
Feeling all alone
Haven't been myself in quite awhile you know
They got in my head, like everybody said
Cautionary tale, how quick the sick can spread

Don't meet their eyes it's hypnotic
Make you forget that it's toxic
Caught up in all the chaotic
Sold you a lie and you bought it
Before you know it you're nauseous
Hands down your throat 'til you vomit
Collapse from all the exhaustion
And now they got what they wanted

Misery, misery is the venom in my brain
Killing me, killing me but I don't feel the pain
Running from somethin' that I can't really explain
Misery, misery is the venom in our veins

Show me where it hurts
I'll show you how it works
They prey on your fear of how it just gets worse
I can't tell if it's real though
Don't know if it's lethal
Did we drink the poison or just a placebo

Don't meet their eyes, it's hypnotic
Make you forget that it's toxic
Caught up in all the chaotic
Sold you a lie and you bought it
Before you know it you're nauseous
Hands down your throat 'til you vomit
Collapse from all the exhaustion
And now they got what they wanted

Misery, misery is the venom in my brain
Killing me, killing me but I don't feel the pain
Running from somethin' that I can't really explain
Misery, misery is the venom in our veins

So watch your step, or you're gonna fall apart
Hold yourself, they gather inside the dark
Don't look down
You won't get far
You're only as strong as you think you
Are!

Running from something that I can't really explain
Misery, misery is the venom in our veins
