

# I See You

Idina Menzel

I lie awake looking back  
God knows this  
Life goes fast

Each day harder than the last  
Breaking down in the dark  
I don't know how I fell this far from heaven  
Can't put the pieces back together

So you lie there and dream

Here's to the lonely  
To the broken-hearted  
I want you to know I feel your pain

Here's to the hopeless  
The almost forgotten  
To those who got lost along the way

I see you  
I see you  
I see you

City streets  
And no one sees  
We all just try to make believe  
That it's all better than it seems

Black and white  
We color in  
We see the world the way we wanna see it  
You either take it or you leave it

Is it all just a dream

Here's to the lonely  
To the broken-hearted  
I want you to know I feel your pain

Here's to the hopeless  
The almost forgotten  
To those who got lost along the way

I see you  
I see you  
I see you

Oh

When you're alone  
And you can't go back home  
At the end of the day  
I'll remember your face

Here's to the lonely  
To the broken-hearted  
I want you to know, I know

I feel your pain

Oh

Here's to the hopeless  
The almost forgotten  
To those who got lost along the way

I see you

I see you
