

The Best Day of My Life

Il Volo

This could be the best day of my life,
suddenly it all just felt so right
I barely know your name
but somehow you have changed the way
I see my life forever

Seeing you has opened up my mind
and meeting you has taken me through time
I'll say it all so fast
My life in just a glance and I'm loving how it feels

This is the best day of my life
Cause after meeting you it all will change
from just looking in your eyes
I thought about my life and spending it with you

It seems as if my life has just begun
because of you I finally see the sun
I can see it all so clear
from you just standing there
I could look so far ahead

If you could only read my mind
and understand the way that I see time
See everything is moving fast
Wasted days are in the past
but its the best day of my life

This is the best day of my life
Cause after meeting you it all will change
From just looking in your eyes I thought about my life
and spending it with you

I see your face in all my dreams
baby tell me that you're my reality
oh
cause your love is everything
Cause nothing is impossible
I put together my whole life at the side of you

This could be the best day of my life
Cause suddenly it all just feels so right
As far as I can see
This really has to be
The best day of my life
